
your fave/main UR records not on the UR label?

there's several records that still belong to my "UR collection", which I think complement the actual UR Rec. releases (and, I'm not a collector who hunts names on records, but I think there's releases that are important to understand the history of the label or would perfectly fit on UR Rec.):

1. Shockwave - Acid Rain vol. 1 (vol. 2 & 3 on UR)
2. WPA 1-3 (like other old recordings f.e Deep Dea Dweller 12", The Theory etc, some have been released on UR then)
3. all SID releases (which I don't own, that's a big :()
4. X-101 & X-102 on Tresor (complement UR-013.5 & 019.5)
5. Galaxy 2 Galaxy on Submerge
6. UR-046 on NSC
7. Revolution For Change on Network

there's many more UR-related ones (Happy Rec., Drexciya on Tresor & Rephlex, UR remixes for Aaron Carl, Kraftwerk, BC etc) but they're not really, how should I say, stations in the UR history like the above mentioned are...

anything missing? anything you don't agree on?

come on man:

the UR remix of Aaron Carl's "Hateful" is pure hi-tech soul: it's got that dark, uncompromising yet melancholic and beautiful feel of UR classics like The Swarm EP and the Electronic Warfare double pack...

Up :P

Hi for me my favorite ep is the :

- Scan 7 - Invisible Thoughts EP

With the song "Decoder"

I heard this sound only twice, and twice it was mixed by Laurent Garnier.

I had a discution with him besides on this subject, and apparently, there had only 500 copies of this vinyl, and only at Detroit.

Do you think to republishing this amazing vinyl one day? :(

"Mimas" on Tresor.

And my favorite track of all times: "Stardancer" on Red Planet (F...ck! I love this track).
